NGUYỄN TRƯỜNG KỲ

FRONT-END DEVELOPER

CAREER OBJECTIVE

Dynamic Software Developer more 3 years of experience, specializing in Front-End and FullStack development and building cross-browser, responsive web applications. Proficient in TypeScript, ReactJS, and Agile environments, with the ability to adapt to Back-End development using Java and Next.js. Dedicated to code quality, optimization, and best practices through documentation, mentoring, and code reviews. Focused on writing clean, reusable, and scalable code while fostering team collaboration. Passionate about continuous learning and professional growth in modern development technologies.

WORK EXPERIENCE

Nimbus Technology **Dec 2025 - Now**

FULLSTACK DEVELOPER

Project Domain: Fintech
Team size: 15 member
Programming: Java, PHP Laravel, Postgresql, ReactJS, MUI, HTML/SCSS, Docker, ESLint, Prettier, Git, MinIO (S3 Storage), JWT
Development Tools: Figma, Notion, IntelliJ IDE and Visual Studio Code.

Key Achievements and Responsibilities:

- Core Application Development: Architected and developed a modern Single Page Application (SPA) using React and Laravel, ensuring secure authentication via JWT.
- Digital Document Processing: Engineered advanced PDF management features, including file merging, automated data extraction, and online previews, integrated with MinIO for S3-compliant secure storage.
- High-Performance Admin Tools: Built robust GUI tools using Java and Spring Boot for large-scale data processing and CSV/Database migrations, significantly improving operational efficiency.
- Designed and developed fully responsive user interfaces for both mobile and desktop platforms, based on Figma design specifications.
- Infrastructure: Orchestrated a multi-service containerized environment (PostgreSQL, MinIO, Service) using Docker Compose, ensuring seamless deployment and environment consistency.
- Using Notion to management task and Document
- Development follow document from client and figma design

The Chad Digital **Mar 2025 - Jul 2025**

FULLSTACK DEVELOPER

Project Domain: Cryptos and Forex
Team size: 4 member(1 office and 3 collaborators)
Skills NextJS, Java8, TypeScript (ES6) - Javascript, getServerSideProps, cache, lazyload, Redux, Ant Design, SCSS, mysql, ESLint, Prettier, RESTful API, Directus (The Headless CMS), Haravan, Google Search Console, SEO, AWS.
Development Tools: Gitlab, Trello, Visual Studio Code.

Key Achievements and Responsibilities:

- Collaborated with the business team to gather and understand requirements.
- Implemented new features and fixed bugs for the websites: vnrebates.io, vnrebates.store, and beecryptos.com.
- Documented and presented requirements on Trello, and managed the Trello board effectively.
- Designed and developed fully responsive user interfaces for both mobile and desktop platforms, based on Figma design specifications.
- Managed tasks and timelines on Trello, including personal assignments and those of collaborators.
- Developed RESTful APIs following industry best practices.
- Performed manual testing to ensure all features met functional and UI/UX requirements.
- Improve and developer feature adapt search engine optimization (SEO)

CYMOSOFT · PART-TIME **Sep 2024 - Jan 2025**

FULLSTACK DEVELOPER

Project Domain: Rental Services
Client: Japan
Team size: 4 member
Skills:
Programming: NextJS, TypeScript (ES6), Tailwind CSS, mysql, Drizzle ORM, ESLint, Prettier, RESTful API, Axios/Fetch, ContextAPI, Docker.
Development Tools: GitHub, Figma, Visual Studio Code.

Key Achievements and Responsibilities:

- Developed a full-stack web application for an air conditioner subscription service using Next.js and ReactJS.
- Implemented API routes in Next.js to handle backend operations efficiently.
- Designed and built a fully responsive user interface (mobile & desktop) based on Figma design specifications.
- Collaborated closely with the team to gather customer requirements and deliver tailored solutions.
- Developed RESTful APIs following best practices.
- Conducted manual testing to ensure features met both functional requirements and UI/UX standards.

PTN GLOBAL **Mar 2024 - Dec 2024**

FULLSTACK DEVELOPER

Project Domain: Education
Client: Australia
Team size: 5 - 7 member
Skills:
Programming: ReactJS, TypeScript (ES6), Material-UI (MUI), React Testing Library(unit test), Storybook, Java, Groovy, Micronaut, Junit, PostgreSQL, Sonarqube, ESLint, Prettier, TanStack Query, Vite, Gradle, Single Page Application, Component-based UI, Axios/Fetch, ContextAPI, AWS.
Development Tools: GitLab, Jira, Figma, IntelliJ IDEA, Postman.
Methodology: Scrum/Agile.

Key Achievements and Responsibilities:
Developing web application Learner Dashboard provides a dynamic portrait of a learner that is accessible 24/7 by all stakeholders in the learning community, including learners, parents, teachers and administrators.

- Collaborated with BAs to clarify client requirements and provided UI/UX recommendations based on business needs.
- Developed responsive React applications using Material-UI, ensuring precise alignment with Figma designs.
- Ensured clean, scalable, and maintainable code by following best practices, ESLint, Prettier, and SonarQube standards.
- Maintained high code quality through self-reviews, cross-reviews, and comprehensive React Testing Library tests.
- Built cross-browser, responsive layouts for seamless desktop and mobile experiences.
- Created interactive UI documentation with Storybook to enhance component reuse and streamline onboarding.
- Developed RESTful APIs following best practices.
- Contributed to backend tasks, including building APIs, services, and unit tests.
- Worked in an Agile environment using Jira, coordinating with clients and developers, conducting live demos for feedback, following Sprint planning, daily stand-ups, reviews, and retrospectives to ensure timely feature delivery.

PTN GLOBAL **Feb 2023 - Mar 2024**

FONTEND DEVELOPER

Project Domain: Healthcare Management Platform
Client: Australia
Team size: 12 - 15 member
Skills:
Programming: ReactJS, TypeScript (ES6), Material-UI (MUI), React Hook Form, Storybook, Auth0, Jest(unit test for component), Sonarqube, ESLint, Prettier, RESTful API, TanStack Query, React-dnd,, Axios/Fetch, ContextAPI, Jenkins, Vite, Single Page Application, Component-based UI, ContextAPI, AWS.
Development Tools: GitLab, Jira, Figma, Visual Studio Code, Postman.
Methodology: Scrum/Agile.

Key Achievements and Responsibilities:
Developing a web application for an epilepsy research center, focused on managing health reports, tracking health conditions, and collecting information from clinics and epilepsy patients.

- Collaborated with BAs to gather and clearify client requirements.
- Developed responsive React applications with Material-UI, ensuring precise alignment with Figma designs.
- Built a reusable component library, extending Material-UI with custom styling for a consistent design system.
- Ensured clean, scalable, and maintainable code with best practices, ESLint, Prettier, and SonarQube compliance.
- Implemented authentication flows with Auth0, delivering seamless login experiences.
- Developed cross-browser, responsive layouts for a smooth user experience on desktop and mobile.
- Maintained high code quality with self-reviews, cross-reviews, and Jest unit testing.
- Created interactive UI documentation with Storybook to streamline component reuse and onboarding.
- Collaborated with the Back-End team to ensure RESTful APIs were designed and implemented following best practices.
- Worked in an Agile environment using Jira, following Sprint planning, daily stand-ups, reviews, and retrospectives to ensure timely feature delivery.

PTN GLOBAL **Dec 2021 - Feb 2023**

FULLSTACK DEVELOPER

Project Domain: Logistic
Client: Australia
Team size: 5 - 10 member
Skills:
Programming: Java 8, Spring Boot, AngularJS, Typescript (ES6), HTML, CSS, Java Android (Android Studio), SQLite, NoSQL MongoDB, Microservices, RESTful API, Maven, Docker.
Development Tools: GitLab, Jira, Visual Studio Code, Android Studio, Postman.
Methodology: Scrum/Agile.

Key Achievements and Responsibilities:
Project has built an innovative system that brings together all elements of Driver Safety, Truck Safety and Maintenance. This innovation has been achieved by combining driver experience and logistics management into a user-friendly set of solutions. Achieved safety accreditation and compliance certification from NHVR.

- Collaborated with BAs to gather and clearify client requirements, providing UI/UX recommendations based on business needs.
- Designed, developed, and maintained an admin web application using Angular, HTML, and CSS.
- Ensured clean, reusable, and scalable, readability code following best practices and consistent code formatting.
- Conducted self-reviews and cross-reviews of code within the team to maintain high code quality.
- Developed responsive and user-friendly interfaces, including real-time notifications, driver tracking, and efficient data management features.
- Back-End Microservices: Designed and implemented scalable and robust microservices using Spring Boot and Java 8, ensuring data accuracy and seamless communication across application components.
- Developed RESTful APIs following best practices.
- Optimized API efficiency and ensured smooth inter-service communication within the microservices architecture.
- Mobile Application Development: Built an Android application using Java, integrating Google Maps and HERE Maps for route management and driver report management.
- Worked in an Agile environment using Jira, following Sprint planning, daily stand-ups, reviews, and retrospectives to ensure timely feature delivery.

SKILLS

- ReactJS (more 3 year)
- NextJS (lazyload, SSR)
- AugularJS
- Typescript (ES6+) (more 3 year)
- TanStack Query, Redux, Axios/Fetch
- HTML/CSS
- Material-UI (MUI)
- Ant Design
- TailwindCSS
- Jest/React Test Library
- Java (8)/Groovy (about 2 year)
- PHP Laravel
- Restful API
- NoSQL MongoDB
- PostgreSQL/MySQL
- ESLint/Prettier
- Docker/AWS/Gitlab/Vercel
- Git
- Scrum/Agile
